

AAEP Vaccination guidelines

<http://www.xcodesign.com/aaep/displayArticles.cfm?ID=171>

Rhinopneumonitis
(EHV-1 and EHV-4)

FOALS AND WEANLINGS:

First dose: 4 to 6 months
Second dose: 5 to 7 months
Third dose: 6 to 8 months
Then at 3-month intervals

YEARLINGS: Booster every 3 to 4 months up to annually

PERFORMANCE HORSES:

 Booster every 3 to 4 months up to annually

PLEASURE:

(AAEP Guidelines-Optional: semiannual if elected)
WOODSIDE RECOMMENDS **Booster every 3 to 4 months up to annually**

BROODMARES: Fifth, seventh, ninth month of gestation (inactivated EHV-1 vaccine); optional dose at third month of gestation

GENERAL COMMENTS:

- Vaccination of mares before breeding and 4 to 6 weeks prepartum (**PREFOALING VACCINATIONS**) is suggested.
- Breeding stallions should be vaccinated before the breeding season and semiannually
